

AFO 416 – Sales

416.1 Introduction

Items can be sold within Vubis Smart in two places.:

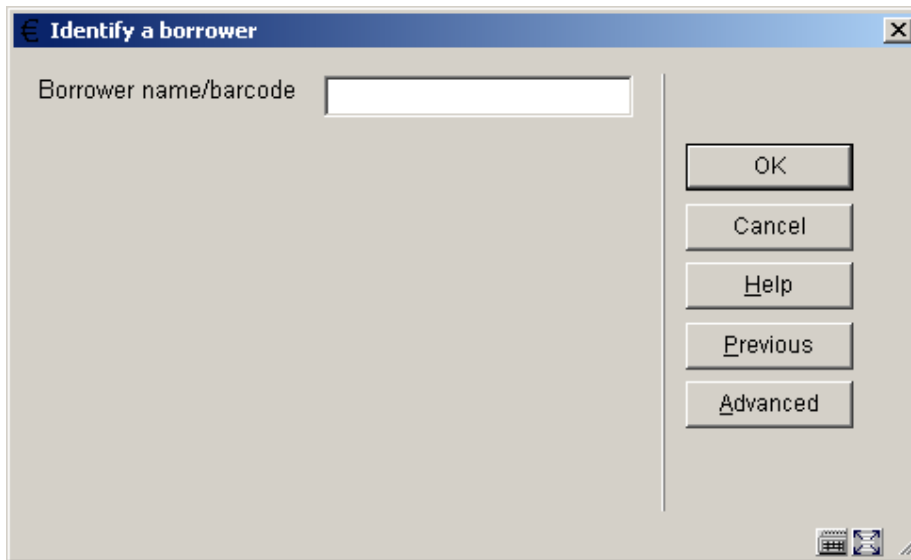

- within loans (AFO 411);
- within sales (AFO 416).

A library can define what articles can be sold. This can be things like: plastic carrier bags, pens, photo copies. Each article can be sold using an (article)code, an (article) number or an (article)barcode.

Article codes are defined in AFO 494 – Cash desk management – Define sale items.

416.2 Sales

After choosing this option the following search form will be displayed:

Select a borrower here. Enter a borrower barcode or part of the borrower's name. See the Help for AFO 431 for all options to identify a borrower.

After identifying the correct borrower, the following form will be displayed:

SALES - 1 item(s)

Borrower: Jansen, A.B.

Barcode: 20031234

Qty sold: 0

Subtotal: 0

Sale item: [dropdown]

Number: 1

\$

Enter the total amount when selecting an item without a fixed price.
This is not required for fixed price items

Total amount: [text box]

Help

Fields on the screen

The data in the first four fields is supplied by the system.

Sale item: Select article from the dropdown list. Once an article has been selected, the system will display its description, followed by a unit price.

Number: Enter the quantity of articles that the borrower wants to purchase in this field. Once you have entered the number of articles to be purchased, the system will display the total purchase price of the selected articles.

Total amount: only enter something here for articles that do not have a fixed price.

Click **OK** to register the sale. The system will update the screen:

€ SALES - 2 item(s) [X]

Borrower Jansen, A.B.

Barcode 20031234

Qty sold 1

Subtotal 1.50

Sale item []

Number 1

\$

Enter the total amount when selecting an item without a fixed price.
This is not required for fixed price items

Total amount []
