16. [Reserve](#)

1. Introduction

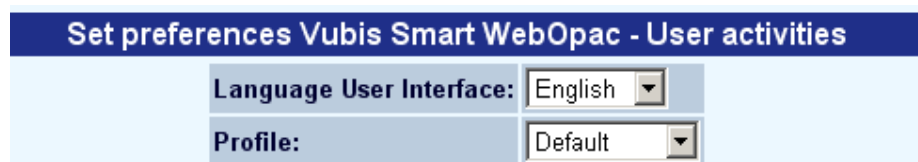

User activities is the name for the part of the WebOpac where the user can view information about his/her personal data and transactions. A description follows of the options that are available for user activities (but their availability depends upon the library – they can all be disabled).

Note

You should not add user facilities to the Web OPAC that are not offered within the loan module of Vubis Smart. For instance, if no financial information is collected for a borrower, you should not allow them to see the option My Financial History under User Activities in the Opac.

You can define options for each profile and for each language.

- Select the language for the profile from the drop-down menu
- Select the profile for which you want to make the changes

Set preferences Vubis Smart WebOpac - User activities

Language User Interface:	English
Profile:	Default

Languages are defined on the Start page.

You can quickly go to a particular section by clicking on one of the index links:

2. Identification

This parameter determines what is required for the user to log in and access his/her details.

Use ASelect for identification	<input type="text" value="No"/>
Fields that will be used for identification	
<input checked="" type="checkbox"/>	Library card barcode
<input type="checkbox"/>	Password
<input type="checkbox"/>	Date of birth
<input type="checkbox"/>	Name code
Number of minutes before automatic logout in case of no activity <input type="text" value="2"/>	
<input type="checkbox"/>	User must log on before every action
Number of characters to be used from first and last name	
Last name	<input type="text" value="4"/>
First name	<input type="text" value="4"/>
Institutions to show in drop down list	
Available options Chosen options	
<input type="text" value="DMS"/> <input type="text" value="TST"/>	<input type="text" value="PNB"/>
<input type="button" value="←"/> <input type="button" value="→"/>	<input type="button" value="↑"/> <input type="button" value="↓"/>
Option to save log on data as a cookie	<input type="text" value="No"/>

- Specify whether or not ASelect is to be used for identification purposes

A-Select is a framework for authenticating users using underlying 'back-end' authentication systems, such as ip authentication, username/password, RADIUS, LDAP, etc. When the user is authenticated using A-Select, the A-Select system returns to Vubis Smart the username as it is known in the A-Select configuration. This username will typically not be the same as the Vubis BorrowerId of the user. Please contact your account representative for more information.

- Tick the checkboxes to select the requirements for identifying the user. These fields must be completed by the user when they access the Opac User Activities.
- Enter the number of minutes that must elapse before automatic logout in case there is user no activity.
- Determine whether or not a user must log in for every action.
- Enter the number of characters that are to be used from the first and last name of the user. Only applicable if you tick **Name code** as required for identification.
- Determine whether or not login data may be saved as a cookie (not recommended for public terminals).
- Amend any texts.

Other texts and messages authentication

Note

When your library has eID (Electronic Identification) enabled it is also possible for borrowers to log in by scanning their eID card. See the separate [documentation on eID](#) on eID (in the General section) for more information.

3. Guest login

Borrowers who do not have a borrower card and who have not registered with the library can register on-line and receive a temporary borrower's card.

REGISTER AS GUEST / CHANGE DATA

Borrowers are allowed to register as guest No

Set whether this option is activated or not.

Available fields

In order for a borrower to be registered, select the fields that are to be filled in for the borrower's registration to be complete.

AVAILABLE FIELDS				Use standard format test	Mandatory field	Show Authority list

Error message confirmation email	<input checked="" type="checkbox"/> You typed two different email addresses
Savelists will be created for the following user(s):	
Available options	Chosen options
ABREAS ACDEWIT ALBERTG ALISESTR ANITAM	<input type="text"/>

Savelists

The system automatically stores borrowers inscribed through the WebOpac in savelists. These savelists are created for ease of use for library staff and gives them direct access to borrowers newly added through the WebOpac, thus enabling to take actions, in case they wanted to. Furthermore, they can of course use SSP for more detailed overviews and statistics.

The savelist names are constructed as follows.

- They are stored for a library defined user id (one or more).
- Savelist type 1: The name of the savelist starts with the character string "ADDWEBD_" followed by the Date (format = YYYYMMDD). Example: ADDWEBD20040910.
- Savelist type 2: The name of the savelist starts with the character string "ADDWEBW_" followed by the Week Number (format = YYYYWW). Example: ADDWEBW200412 (week 12 of 2004).
- Savelist type 3: The name of the savelist starts with the character string "ADDWEBM_" followed by the Month (format = YYYYMM). Example: ADDWEBM200412 (December 2004).

Specific settings

Modify the texts as required and set various defaults.

Settings specific for Register as Guest	
Text on button on login screen	<input checked="" type="checkbox"/> Register as guest

Message about sent email	<input type="text" value="A confirmation email message is sent to you"/>
Error message user record locked	<input type="text" value="It is currently not possible to change your user data"/>

4. Main menu

Use the next section to determine the wording for each of the options seen by the user when they have logged in using the User Activities option through the WebOpac:

MAIN MENU USER ACTIVITIES	
Titlebar main menu	<input type="text" value="USER ACTIVITIES"/>
*	<input type="text" value="My VUBIS"/>
*	<input type="text" value="My personal information"/>
*	<input type="text" value="Change my password"/>
*	<input type="text" value="My cardex"/>
*	<input type="text" value="My save list with bibliographical descriptions"/>
*	<input type="text" value="Alerting services"/>
*	<input type="text" value="Loan Information"/>
*	<input type="text" value="My loans, with possibility of renewal"/>
*	<input type="text" value="My loan history"/>
*	<input type="text" value="My account"/>
*	<input type="text" value="My financial history"/>
*	<input type="text" value="My reservations"/>
*	<input type="text" value="Suggestions/Order"/>
*	<input type="text" value="Feedback"/>

- My personal information:

- This will display various pieces of user information such as name, address, etc. based on the site's customisation of this option.

Note

The way the name of the logged in user is displayed in the title bar of the WebOpac is determined by the settings in AFO 482 - Borrower Name Setup - "Display".

- Change my password:
 - If the user access is granted by password (or PIN) then the site can allow this option to have the user change the system-generated password. This password will follow the rules setup in Vubis Smart.
- My cardex:
 - If the serials module is in use, borrowers can mark titles that they are interested in and have a list of last received issues and the next expected issues.
- My save list with bibliographical descriptions:
 - If a user is logged in when marking records, these will be saved on the Vubis WebOpac server and can be retrieved at any time.
- Alerting services:
 - This is access to the SDI (Selective Dissemination of Information) where users can create automated selects on the database which are e-mailed to the user.
- My news:
 - This option is not yet implemented.
- My loans, with possibility of renewal:
 - This will list the current loans for the user as well as mark all items that can be renewed based on the Vubis Smart settings.

- My loan history:
 - This will show a count of all items checked out, renewed and reserved along with overdue notice counts. In addition, any loans with the loan history saved will also display.

- My account:
 - This will show all outstanding amounts owed by the user.

- My financial history:
 - This will show all fines and fees that have been processed in the past (if the relevant parameters have been set in Vubis Smart).

- My reservations:
 - This will show all the current reservations for the borrower along with their status'

- My "Lenen Loont":
 - Option reserved for the Dutch market.

- My deposits:
 - This will show the deposit information for the borrower.

- Feedback:
 - This will allow borrowers to e-mail the site with comments.

My catalogue

Use this section to determine which of the available options will be displayed to the end user – select items on the left-hand side and move them to the right and then re-order as necessary:

My Catalogue	
Available options	Chosen options
<ul style="list-style-type: none"> My personal information ▲ Change my password My cardex ▼ 	<ul style="list-style-type: none"> My save list with bibliographical descriptions
<hr/>	
Loan Information	
Available options	Chosen options
<ul style="list-style-type: none"> My loan history My "Lenen loont" My deposits 	<ul style="list-style-type: none"> My loans, with possibility of renewal ▲ My account My financial history ▼
<hr/>	
Suggestions/Order	
Available options	Chosen options
<ul style="list-style-type: none"> 	<ul style="list-style-type: none"> Feedback

5. General information

Use this section to determine what pieces of borrower information will be displayed to the end-user. You can first determine which blocks of information are available. Next you can determine for each block which specific lines will be shown.

GENERAL BORROWER INFORMATION	
Sections of information to show	
Available options	Chosen options
<input type="checkbox"/>	<div style="border: 1px solid black; padding: 2px;"> Barcode Identity Home Address Locations Address 2 </div>
Fields to show per section	
Barcode	
Available options	Chosen options
<input type="checkbox"/>	Barcode

Available options	Chosen options
<input type="checkbox"/>	Institution/Location
Address 2	
Available options	Chosen options
<input type="checkbox"/>	<div style="border: 1px solid black; padding: 2px;"> Street No. City </div>

6. Change password

This allows for the modification of text displayed when a borrower attempts to change their password:

CHANGE PASSWORD	
	Change
	Your password is changed
	Unknown error occured during password change
	Old password is incorrect
	New passwords do not match
	New password cannot be blank
	CHANGE P A S S W O R D
	Enter new password
	Confirm new password
	Enter old password

7. Cardex

This allows you to define the fields that maust be shown when a user selects the Cardex option:

CARDEX	
Fields to show	
	Issue
	Expected
	Received
	Status
	Status date
	Part title
	Public note
Available options	Chosen options
<input type="text"/>	<div style="border: 1px solid gray; padding: 2px;"> <div style="display: flex; justify-content: space-between; align-items: center;"> Issue ▲ </div> <div style="display: flex; justify-content: space-between; align-items: center;"> Expected ▼ </div> <div style="display: flex; justify-content: space-between; align-items: center;"> Received ▼ </div> <div style="display: flex; justify-content: space-between; align-items: center;"> Status ▼ </div> <div style="display: flex; justify-content: space-between; align-items: center;"> Status date ▼ </div> </div>

As well as status texts:

Status texts	
	Received
	Returned
	Claimed
	Next expected issue
	Next expected index
	Next expected supplement
	Missing

And other texts:

Other texts	
	ISSN
	Institution
	Issue information
	Issues
	Maximum issues
	Save changes
	Save in personal cardex
	Title

8. Loan history

This allows for the modification of text and options when a user selects the loan history option:

LOAN HISTORY	
Summary loan history	
	Abnormal return
	Total loans ever recorded
	Date last loan
	Number Of Claims
	Reservations ever recorded
Available options	Chosen options
Abnormal return	Reservations ever recorded Total loans ever recorded Date last loan Number Of Claims
General options	
<input type="checkbox"/>	Borrower can enable use of loan history for mailings
Texts and messages	
	Use loan history for mailings
	Save

As well as for the details of the loan history:

Details loan history	
	Title
	Volumenr.
	Last check out date
	Intern number
Available options	Chosen options
	Title Volumenr. Last check out date Intern number

9. Current loans

This allows for the modification of text when a user selects the current loans option. You can also specify here whether or not a user is allowed to renew his/her own materials currently on loan.

CURRENT LOANS

Fields to show

General options	
<input type="checkbox"/>	Borrower can use credit/debit card for payments
Texts and messages	
	additional charge:
	Please contact the library staff. a payment transaction has been sta
	Payment did not succeed

12. History payments

This section allows for the modification of texts and options when the My Financial History option is chosen:

HISTORY PAYMENTS	
Fields to show	
	Amount
	Date payment
	Details
	Payment type
	Receive type
Available options	Chosen options
	<div style="display: flex; align-items: center;"> <div style="margin-right: 10px;"> </div> <div style="border: 1px solid black; padding: 2px;"> Date payment Amount Payment type Receive type Details </div> <div style="margin-left: 10px;"> </div> </div>

13. Deposits

This section allows for the modification of texts and options when the My Deposits option is chosen:

DEPOSIT PAYMENTS	
Fields to show	
	Amount
	Date payment
	Details
	Payment type
	Receive type
Available options	Chosen options
<ul style="list-style-type: none"> Amount Date payment Details Payment type Receive type 	<div style="border: 1px solid gray; height: 40px; width: 100%;"></div>
General options	
<input type="checkbox"/>	Borrower can enable automatic invoicing for deposits
Texts and messages	
	Allow automatic invoicing for deposits
	Show Details for Deposit
	Deposit Details
	Deposit Description

14. Feedback

This section allows you to specify various texts related to the Feedback option:

FEEDBACK	
	Main menu user activities
	Send message
	Update
	Delivery failed. Please try again later.
	Message successfully sent to the library.
	MESSAGE TO THE LIBRARY
	Message from the user:
	The library administration has no email address of you. If you have a

15. Newsfeeds

RSS news feeds can be integrated in two types of WebOpac sessions: anonymous and private sessions. In anonymous login sessions, the system does not know who is sitting in front of the screen. In private login sessions, the user of the system has identified him self and the system knows who is sitting in front of the screen.

Both for private and anonymous sessions the preferences are defined as part of the User Activities. For a private session this is obvious: the user can select his preferred news channels by logging in and selecting the channels as part of the User Activities.

To enable this for anonymous sessions, the system allows the definition of a so-called "pseudo-borrower". This is a borrower that can be linked to a WebOpac profile. The standard User Activities can then be used to define the RSS channels for the profile by identifying the pseudo-borrower to access "his" User Activities..

In the preferences you can change the texts but also you can define a "pseudo-borrower" for which the news feeds are displayed when you do not logon (i.e. for anonymous WebOpac sessions).

NEWSFEEDS	
Institution and barcode for unregistered borrower	
Institution	PNB >
