

Webopac Preferences – Shelfmarks

1. [Introduction](#)
2. [Setup](#)

1. Introduction

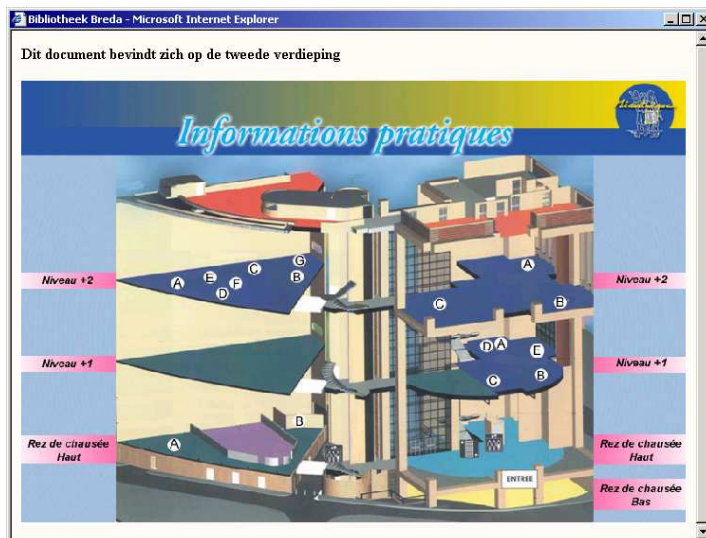

Vubis Smart allows you to link shelfmark locations in the WebOpac to a graphical representation. The shelfmark then becomes a hyperlink. For example, it could display a map or diagram of your library, showing the general location of an item that has been retrieved in a search.

The screenshot shows a 'Full description' page for a book. The title is 'Avontuur in het verleden : Vier science fiction-verhalen / Poul Anderson'. The author is 'Poul Anderson'. The edition is '2e dr'. The publisher is 'Utrecht; Antwerpen : Het Spectrum, 1984'. The pages are '169 p.'. The bibliographic annotation is 'Oorspr. uitg. - Guardians of Time - New York: Ballantine, cop. 1960'. The ISBN/ISSN is '90-274-14068'. The holding information shows two entries: 'BD : New books 543' and 'BD : New books 545', both with '1 or more copies available' and a 'Details' link. The availability is '1 or more copies available'. There is a 'Related works' button at the bottom.

Title	Avontuur in het verleden : Vier science fiction-verhalen / Poul Anderson		
Author	Poul Anderson		
Edition	2e dr		
Publisher	Utrecht; Antwerpen : Het Spectrum, 1984		
Pages	169 p.		
Bibliographic annotation	Oorspr. uitg. - Guardians of Time - New York: Ballantine, cop. 1960		
ISBN/ISSN	90-274-14068		
Holding	BD : New books 543	1 or more copies available	Details
	BD : New books 545	1 or more copies available	Details
Availability	1 or more copies available		

When you click the link a diagram, map or similar is shown:

The texts and images are contained in a CSP page and can be different for each profile.

Note

Creation of a CSP page demands a knowledge of Caché. The addition of such a page by Infor would not be in the normal scope of installation.

See also the chapter on CSP pages in the Technical Tips section.

2. Setup

First you must create the CSP pages via the Caché cube – Configuration Manager.

You can optionally add images for each CSP page as well as descriptive text. These must also be created prior to adding them via the Web Preferences tool.

- Click the **Shelfmarks** button under the **All Profiles** section on the Start page.

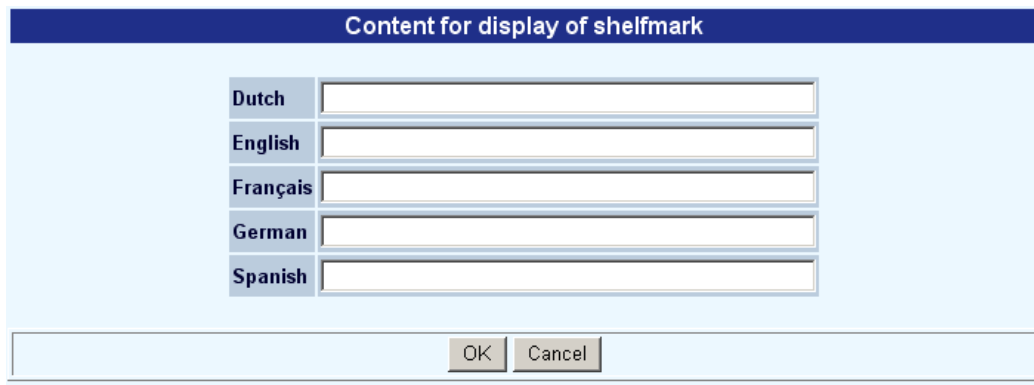

The **Shelfmarks** screen is displayed:

Institution/Location	Shelfmark	IP Address	Type	Content
PNE/CL			CSP	Add
CSP				
IMG				
TXT				

- Select a language from the dropdown list.
- Select a database from the dropdown list.
- Select an institution/location from the dropdown list

- Enter a shelfmark (range) and an IP address.
- Choose the type (CSP page, text or image)
- and click on the **Add** button.

After clicking on the **Add** button the **Content for display of shelfmark** screen will be displayed:

Content for display of shelfmark	
Dutch	<input type="text"/>
English	<input type="text"/>
Français	<input type="text"/>
German	<input type="text"/>
Spanish	<input type="text"/>

OK Cancel

- Add the wording for each language and click **OK**.

When you are finished remember to click the **Save changes** button to save any changes you have made.

- **Document control - Change History**

Version	Date	Change description	Author
1.0	June 2006	Creation delivered as part of build 17 updates
