

# AFO 255 - Print one order

## 255.1 Introduction

The system makes provisions for printing all the details linked to a purchase order. This produces extremely detailed overviews that take up more than a page of A4 per order.

## 255.2 Print one order

If you select this AFO an input screen will be displayed:

The screenshot shows a dialog box titled "Order data for" with a shopping cart icon. It contains two input fields: "Order number" and "BD number", with the word "or" between them. To the right of the input fields are three buttons: "OK", "Cancel", and "Help". The "OK" button is highlighted.

Here you can enter either an **order number** or a **BD number** (record number) with at least one purchase order linked to it. The system then switches to the standard output procedure.

### Note

In case you have entered a BD number the system will print details of all orders associated with this title.
