

# AFO 646 Creation of data for suggestions

## 646.1 Introduction

"Suggestions" , based on what other readers of the book also read are a WebOpac function that can be installed as an add-on product.

When this is installed it can be activated via the WebOpac Preferences. Once this is done, an additional button "Suggestions" will be displayed on the full record screen.

Users can click this button to view other titles 'related' to the current one.

These relations are created between records based on similarities in their circulation 'behaviour'.

You can use this AFO to periodically rebuild these relationships. We recommended this is done every 2 to 3 months.

It is possible to create a savelist with the borrowers that should not be included in the creation process. This gives you the opportunity to fill the savelist manually, but also to use SSP to put all institutions into that savelist.

The user can make a save list with borrowers that need to be skipped by these procedures, such as borrowers used in tests or institutional borrowers.

The name of the save list must be WDLLOEXCLUDES (mandatory name) and for "General use".

After selecting this AFO, the standard screen for scheduling processes will be displayed.

## 646.2 WebOpac

In the WebOpac Preferences the option must be activated under Texts per Profile:

FULL DESCRIPTION	
	Full description
	Relations
*	Show button 'LeenDirect': Yes ▾
*	Show button 'Suggestions': Yes ▾

Once this is done, the button will appear below the record details:

Availability	BD : qa1234 SCHOOL LIBRARY : qa1234	Currently Unavailable Currently Unavailable	<a href="#">Details</a> <a href="#">Details</a>
		<a href="#">Suggestions</a> <a href="#">Related works</a>	
<b>Rate and Review(s)</b>			

When the customer clicks on the option "Suggestions" a new screen will be displayed with 'related' titles:

Suggestions, based on loan data *)			
Page 1 / 1 (3 items)			
Description	Year	Shelfmarks	Availability
<input type="checkbox"/> A. Auteur, Beyond the Farthest Star-- [Book] Eindhoven 2002	2002		
<input type="checkbox"/> Author William Shatner, Star Trek and more-- Den Bosch 2002--1940-	2002		
<input type="checkbox"/> Jan Vanvoorden, Where is the sun-- [DVD-Video] London 2002Dean, Alan	2002		

People who have borrowed the previous title, have also borrowed the titles in the above list.

## Note

Because colour scheme, layout etc. are configurable by the library, these examples may not be representative for your situation.
